Audified U73b Compressor Release Notes

3.1.0

- Brand new graphic user interface.
- New licencing system.
- Windows VST3 32bit plug-in format no longer included.

3.0.0

- macOS 12 and newest DAWs compatibility improved. 32bit builds are no longer included for macOS platform so older 32bit DAWs are not supported. macOS VST3 and AU plugins are now delivered as universal binaries for both Intel64 and arm64 platform – plugins are Apple Silicon native.
- Compression amount parameter added.
- Switching between modes and release time settings made smoother.
- Updated graphic user interface.
- Special offers from Audified website integrated to plugin GUI.
- VST2 plugin format no longer included.
- Installers of version 3.0.0 always uninstall any older version, including VST2.

2.0.2

- mac OS platform only specific update.
- macOS 12 and newest DAWs compatibility improved. 32bit builds are no longer included for macOS platform so older 32bit DAWs are now not supported.
- Minimal required macOS version changed to 10.11 (El Capitan).

2.0.1

- Key Input menu functionality fixed.
- Improved AudioUnit compatibility with older Carbon hosts.
- Plug-in now reports latency caused by activated oversampling.

2.0.0

- External sidechaining ability implemented for VST3, AU and AAX plug-in format.

- Oversampling switch parameter added.

- Automatic Output volume function added.

- Calibration parameter range extended, now with the possibility of setting the default value used for every newly inserted U73b Compressor plug-in.

- Algorithms performance and stability improved.

- Major GUI update with Retina support. The GUI language is switchable between German and English, display color is adjustable with ability to be set by DAW so it corresponds to the track color.

- System requirements changed to:

  ○ OSX 10.9.5 (Mavericks) and newer,

  ○ Windows 7 and newer.

- RTAS plug-in format support dropped.

- **Note:** As there are several new parameters and abilities added to the plug-in, please check the parameter settings when using the new version in existing projects stored with the older U73b Compressor plug-in version.

1.1.2

- ProTools on Mac compatibility improved.

- Studio One 3 stability fixed.

- User presets handling improved.

- Windows Vista support dropped.

AUDIFIED
