Sphene Release Notes

1.1.0

- macOS 11 and newest DAWs compatibility improved. 32bit builds are no longer included for macOS platform so older 32bit DAWs are not supported. macOS VST3 and AU plugins are now delivered as universal binaries for both Intel64 and arm64 platform – plugins are Apple Silicon native.
- Requirements changed: The oldest supported macOS version is macOS 10.11 El Capitan.
- VST2 plugin format no longer included.
- Installers of version 1.1.0 always uninstall any older version, including VST2.
- Activation process changed – demo and full version now in one installer. You can activate the license from the plugin.
- Updated graphic user interface.

1.0.2

- Cabinet and amp switches functionality improved.
- DPI-awareness and auto-scaling ability added to Win VST3 plugin format.
- Demo version added.

1.0.1

- Version skipped.

1.0.0

- First release.
