

MixChecker Pro Release Notes

1.3.4

- Fix installers forcing Rosetta installation.
- macOS deployment target changed to 10.14.
- Remote Control app is no longer supported.

1.3.3

- Stability improvements.

1.3.2

- Stability improvements.
- macOS uninstaller added.
- macOS deployment target changed to 11.13.

1.3.1

- New automatic update notification system.
- Stability and host compatibility improved.

1.3.0

- Brand new graphic user interface.
- New licencing system.
- Windows VST3 32bit plug-in format no longer included.

1.2.0

- macOS 12 and the newest DAWs compatibility improved. macOS VST3 and AU plug-ins are now delivered as universal binaries for both Intel64 and arm64 platforms – plug-ins are Apple Silicon native.
- UI redesigned to make the Adjustment area always accessible.
- VST2 plug-in format no longer included.

1.1.1

AUDIFIED

- macOS 10.15 Catalina compatibility ensured. 32bit builds are no longer included so older 32bit DAWs are now not supported.
- UI functionality in macOS 10.15 Catalina improved.
- Rare startup plug-in scanner troubles in older DAWs reduced.

1.1.0

- Custom label is shown directly in the simulations buttons.
- Button Edit mode behaviour improved.
- Detection of the machine IP address for remote control improved on the macOS platform.
- Audified news channel added.

1.0.1

- Stability and host compatibility improved.
- Remote control capabilities extended.

1.0.0

- First release.
