Uninstallation/Clean Installation in Mac OS X

Use the provided uninstaller – available from the installation disk image (DMG).

Update/Upgrade

- Select **Check For Updates** from the Services menu.
- If an update/upgrade is available, you will be redirected to the download section of our web site.
- Download the newest installer from the page you have been redirected to.
- Uninstall the old version.
- Run the installer.

How To Backup Your Data

To backup your user presets, save the preset files to a safe place.

You can open the containing folder through the plugin's GUI or find it manually.

Windows:

- Depending on your user settings made during the installation you will find the preset files in your private or shared documents folder.

[Documents]\Audified\MultiDrive PRO\Presets\

Mac:

[home]/Documents/Audified/MultiDrivePRO
